Summary

B.Tech student building production-style full-stack (MERN) and applied AI systems: RAG pipelines, multi-agent platforms, and FastAPI services handling 10,000+ requests/day at 99.2% uptime. Solid grounding in DSA, OOP, and systems fundamentals; 400+ problems solved on LeetCode/GeeksforGeeks.

Education

National Institute of Technology Delhi --- New Delhi, India

B.Tech in Electronics and Communication Engineering --- 2023 to 2027

- Relevant Coursework: Data Structures & Algorithms, Operating Systems, DBMS, Computer Networks, Object-Oriented Programming (OOPS).

Kendriya Vidyalaya Sangathan --- Bihar, India

Senior Secondary Education (Class XII) --- Completed 2023

Technical Skills

Languages: C, C++, Python, Go (Golang), JavaScript (ES6+), HTML5, CSS3, SQL

Frameworks & Libraries: React.js, Node.js, Express.js, Tailwind CSS, RESTful APIs, MERN Stack, LangChain, LangGraph, FastAPI

Tools & Platforms: Git, GitHub, Docker, Postman, VS Code, Linux, MongoDB, Zephyr RTOS

Data / Scientific Libraries: NumPy, Pandas, Matplotlib, SCAPS-1D

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, DBMS, Computer Networks, Retrieval-Augmented Generation (RAG), Multi-Agent Systems

Experience

National Institute of Technology Delhi --- New Delhi, India

Research Intern, Electronics & Communication --- June 2025 to July 2025

- Engineered high-fidelity solar cell simulations in SCAPS-1D to evaluate photovoltaic carrier transport.
- Tuned semiconductor doping profiles, cutting recombination losses by 15%.
- Benchmarked I-V characteristics and Fill Factor (FF) against theoretical efficiency limits.

Projects

Generative AI Platform --- Python, LangChain, FAISS, Docker

- Built a production-ready GenAI system for conversational AI and document-based question answering over LLMs.
- Implemented RAG with a FAISS vector database for semantic search and context-aware responses.
- Shipped LLM-powered chatbots on OpenAI APIs with Streamlit interfaces, Dockerized for deployment.

Autonomous Multi-Agent Software Engineering Platform --- Python, LangGraph, CrewAI, FastAPI, Docker

- Built a multi-agent AI platform for automated coding, testing, and debugging, cutting manual effort by 65%.
- Scaled FastAPI microservices to 10,000+ API requests and 2,500+ workflows at 99.2% uptime.
- Layered RAG pipelines (FAISS + OpenAI APIs), lifting code accuracy 40% and cutting latency 35%.

AI Browser Automation Agent --- Python, Playwright, LangGraph, OpenAI APIs, Redis

- Built an AI browser agent running 5,000+ automated actions/day at 92% task accuracy.
- Cut manual workflow time 70% with LLM-based planning pipelines.
- Added async retry pipelines, lifting automation reliability 50%.

Leadership

Think India Club, NIT Delhi --- Technical Lead

- Organized 5+ technical seminars and workshops for 50+ student participants.
- Led a peer team coordinating national-level hackathons, growing a culture of coding and innovation.

Achievements

- **Competitive Programming:** 400+ algorithmic problems solved across LeetCode and GeeksforGeeks.
- **JEE Mains Rank Holder:** 98.8 percentile --- top 1.4% of 1.1 million candidates.
- **Flipkart GRID 7.0:** Advanced to National Semifinals after rigorous technical rounds.
- **Hackathon Winner:** 1st Place, NIT Delhi Internal Hackathon --- Smart Automation.
